NETCOST RELEASES THEIR UPGRADED CLIENT PORTAL *CLAIM ACCESS*

Streamwood, IL, 9-8-2010: Netcost Claim Services, a U.S. based Nationwide Claims Administrator releases their 3.0 Version web based Client Portal *Claim Access* for their Insurance and Fleet leasing clients.

This client interface allows Netcost clients to combine all service offerings under one roof, add new claims online, track existing claims real-time, and run a number of statistical reports regarding their services for their clients.

One step further, major improvements have been made to add more client connectivity and situational awareness during the claim process.

"We have taken our clients suggestions and used them to improve our clients' experience. We are sure our clients will find the ease of Claim Access helpful in acquainting their staff with very little orientation or training." (Mario Veltri, COO of Netcost Claim Services)

About Netcost:

Netcost is a nationwide claims administrator servicing Insurance and Fleet clients' needs with a full menu of claim handling services, including Windshield Repair and Replacement, Roadside Service and First Notice of Loss. Netcost has delivered superior service through the years while expanding the original automotive glass solution to a menu of complimenting claim services. The Netcost technical integration team offers state-of-the-art technology to support their network, including real-time claim tracking, instant online claim access, the ability to integrate with any system and more.
